MAINTENANCE WORK ORDER HISTORY

CMMS Export | Asset P-1101A | Period: Jan 2024 – Jan 2025

Computerised Maintenance Management System (CMMS) export — work order history for asset **P-1101A**. Each work order below was raised, executed and closed independently by the shift maintenance crew.

WO Number	Date	Type	Reported Problem	Work Done	Tech
WO-2024-0312	18-Mar-2024	Breakdown	Seal leakage, oil seepage at gland	Replaced DFS-3300 cartridge seal. Pump restarted. No alignment check recorded.	Khan
WO-2024-0718	09-Jul-2024	Breakdown	Repeat seal leak, smoke observed	Replaced seal cartridge again. Buffer reservoir found low, topped up.	Khan
WO-2024-1109	14-Nov-2024	Breakdown	Seal failure, pump tripped on high vibration	Replaced seal. Noted coupling 'looks off' but no laser alignment done. Closed.	Patil
WO-2025-0102	05-Jan-2025	Preventive	Quarterly lubrication	Bearing oil changed. Vibration noted high, referred to reliability.	Patil

Note: Three breakdown seal replacements on the same asset within 8 months (Mar, Jul, Nov 2024). Each WO was closed as an isolated repair; no linked root-cause investigation is recorded in the CMMS.
